

Better Together

Maintain immune strength and promote digestive health to help horses feel and perform their best.

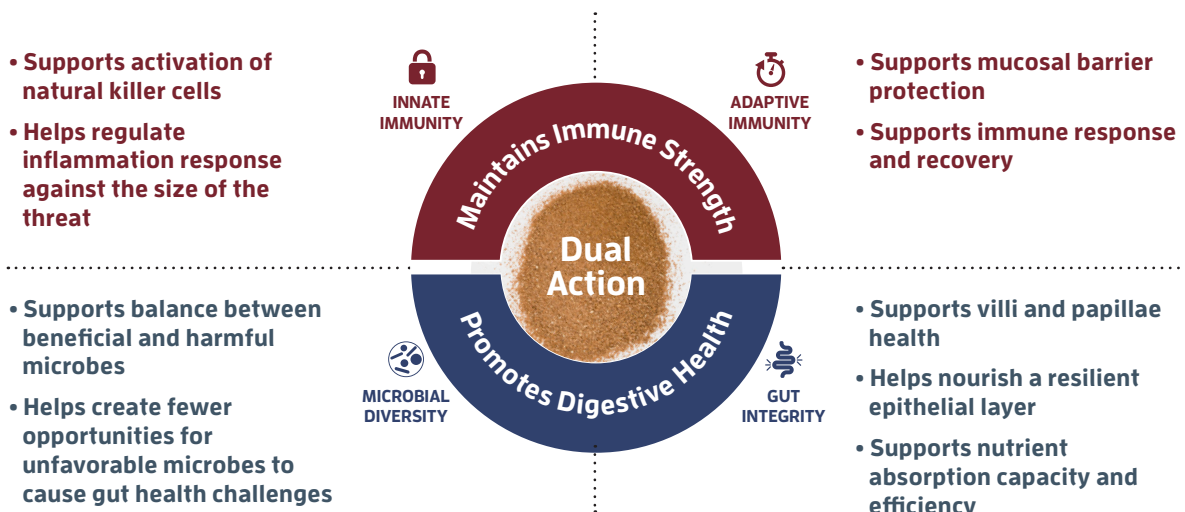

A horse's gut is the engine that drives horse health and performance. In fact, more than 70% of the horse's immune cells are found in the gut. The immune system has co-evolved along with the gut to create defenses against pathogens.

MORE THAN 70% OF THE HORSE'S IMMUNE CELLS ARE IN THE GUT

TruEquine™ builds upon the strong digestive-immune connection to support horse health and performance. This unique postbiotic ingredient delivers a consistent supply of the right combination of metabolites to the gut to help beneficial microbes flourish where they can support the horse's immune response to perceived threats and maintain overall health.
